

# GX 12/29 EVO GEL - FREELIFT

# FULLY FEATURED COMPACT STACKER

www.pramac.com

This compact, powerful and robust stacker is the ideal solution for working in confined spaces.

The reduced width (800 mm), the lateral driving system and the wide mast positioning allow great manoeuvrability, stability and visibility.

Built-in battery charger with integrated cable and plug make it a plug and play unit!

# **GX EVO GEL**

The EVO version is equipped with powerful GEL batteries that allow long endurance and large number of charging cycles. The ergonomic technopolymer tiller offers a comfortable grip. A specific electronic control enables lifting the forks with a proportional usage.

## **GX EVO GEL FREE LIFT**

This stacker combines the features of the GX EVO GEL (long life and endurance GEL batteries, proportional fork control) and a more ergonomic tiller with the total FREE LIFT, permitting to rise the forks from the ground level without increasing the minimum machine height.

For this reason the truck can also be used in working spaces with reduced height.

#### MANOEUVRABILITY

The overall width is the same as the Europallet (800 mm) to allow working in narrow spaces and corridors, increasing manoeuvrability and reducing the turning radius. The combination of side guide, wide mast and low cover offer outstanding visibility.

# TILLER EVOLUTION

Fully integrated ergonomic technopolymer tiller system including finger tip throttle and proportional fork controls, safety pushbutton, horn, turtle button, hourmeter, battery status indicator as standard equipment.

### **TURTLE MODE SWITCH**

Offered as standard, this function enables operating the truck in confined spaces: it allows the unit to travel with the tiller in upright position.

This function is activated by pressing the turtle button on the tiller and rotating the drive control throttle. The truck travels at limited speed.

Release the button to disable this function.

#### COVER

Strong ABS cover with storage compartments on top, easily removable to speed up maintenance operations. The bottom access opening enables an immediate disassembly of motor wheel, portal and tiller without lifting the machine. Schuko plug with spiral cable for an easy battery charging.

#### MAST

Wide mast with sticker ruler enables the operator to easily check the forks elevation by sight.

#### **BATTERY PACK GEL**

The use of powerful high energy throughput GEL batteries makes the machine extremely flexible in every application, thanks to the multiples benefits of GEL technology, such as:

- 1. Maintenance-free (no topping up)
- 2. Long service life
- 3. High number of cycles (IEC 60254-1)
- 4. Extraordinary deep discharge protection
- 5. Low self discharge rate
- 6. Superior shelf life
- 7. No acid stratification
