

# RX 10/16 EVO LI-ION

## COMPACT MONOMAST STACKER WITH LITHIUM BATTERY

### MONO MAST STACKER

RX is the most compact in the stackers' range, single mast, completely electric, suitable for loads up to 1.000 kg, allowing a comfortable, safe use, with low maintenance costs, thanks to robust design with easy access for maintenance. RX combines compactness and ergonomics, covering a wide range of daily applications in the "light duty" area (not for continuous use).

### RX EVO LI-ION

The lithium battery is one of the protagonists that characterizes this RX stacker. An innovation that, combined with the advantages of the EVO version, manages to make the difference in terms of productivity. The EVO technopolymer tiller ensures comfort and ergonomics for the operator. The proportional control of the forks allows you to raise and lower loads with precision and safety.

### TILLER EVOLUTION

Fully integrated ergonomic technopolymer tiller system including finger tip throttle and proportional fork controls, safety pushbutton, horn, turtle button, hourmeter, battery status indicator as standard equipment.

## TURTLE MODE SWITCH

Offered as standard, this function enables operating the truck in confined spaces: it allows the unit to travel with the tiller in upright position.

This function is activated by pressing the turtle button on the tiller and rotating the drive control throttle. The truck travels at limited speed.

Release the button to disable this function.

## VERSATILITY

It's ideal to move, even horizontally, palletized goods and at the same time it can be used as an adjustable workable, reducing stress for the operator who must place goods on a shelf. Forks thickness 60 mm for an easier entrance inside pallet, while working in elevation.

## EASY MAINTENANCE

Strong ABS carter/cover with storage compartments on top.

Easily removable to speed up maintenance operations.

The bottom access opening allows an immediate disassembly of motor wheel, portal and tiller without lifting the machine.

## ERGONOMICS

Ergonomic tiller placed laterally to increase visibility, ensuring an optimal arrangement of components inside the motor compartment. RX 10 solves perfectly the problem of handling goods in narrow spaces and corridors.

## BATTERY PACK

Maintenance-free Li-ION battery featuring:

- Rapid charge: fully recharged in less than 2 hours.
- Opportunity of charging allowed.
- Long battery life.
- Super light weight.
- Safety: acid-free battery means users are not exposed to any risk of injury.

## AUTOLEVELLING SYSTEM (OPTIONAL)

This device allows an automatic forks lifting and lowering control depending on the load height.

The positioning of the sensor is easy adjustable through the magnets and can be done on both side of the mast for maximum ergonomic.

The operator safety is granted by limit switches and a beeper that advice the beginning of the action.

Autolevelling can be offered also as a retrofit available for all the RX10 EVO range.
